L3: Entry 3 of 5 File: USPT Aug 25, 1998

DOCUMENT-IDENTIFIER: US 5798333 A
TITLE: Water-soluble concentrates containing cyclosporins

Brief Summary Text (11):
Another approach to overcoming the hydrophobicity of cyclosporins is to incorporate in the composition, along with the cyclosporin, a water-soluble surfactant which will solubilize the cyclosporin by forming micelles when the composition is mixed with water. Such compositions will be referred to herein as "solution preconcentrates".

Brief Summary Text (15):
The polyoxyethylated castor oil is a water-soluble surfactant which solubilizes the cyclosporine in water by forming micelles, and the purpose of the ethanol is to solubilize the cyclosporine in the composition to prevent precipitation before the composition is dispersed in the water.
